

PHP Assignment`

1. Write a PHP script that:
 - Concatenates two strings
 - Concatenates a **greeting** and a name (e.g Good afternoon, John)
2. Write a PHP script that uses the .= operator to add more text to an existing string
3. Concatenates multiple strings in one line
Divide this sentence to three strings and concatenate them altogether
Learning PHP is fun!
4. Concatenates a string with a number
e.g *the total is: 100*

Section b: Conditional Statement using if and else statement

1. Checks if a string is empty
2. Checks if a student's score is pass or fail. (Pass mark is 50)
3. Checks if a person is an adult (18 or above) or a minor (below 18).
